

POST RELICS

REBRAND STUDY

01 / POST RELICS

MATERIAL AFTERLIFE

INDEPENDENT CONCEPT / NOT AFFILIATED

RETURN TO THE OBJECT.

-
- | | | |
|----|------------------------------|---|
| 01 | TOO MUCH UI | Rounded cards, capsules and dashboard patterns made the identity feel corporate. |
| 02 | COLOR DISTRACTION | Orange competed with the materials and moved the brand away from its black core. |
| 03 | NEW SYMBOL, WEAK LINK | The rift mark was coherent in theory but visually distant from the original dotted signature. |
| 04 | OVER-EXPLANATION | Every page explained the system instead of letting image, scale and silence create desire. |
| 05 | INCONSISTENT VOICE | Mixed presentation styles weakened the high-fashion point of view. |

KEEP

BLACK AS ENVIRONMENT

RAW PRODUCT PHOTOGRAPHY

HANDMADE IRREGULARITY

DOT / BEAD MOTIF

SPARSE E-COMMERCE RHYTHM

The redesign amplifies what is already present. It does not invent a separate mythology.

MATERIAL AFTERLIFE

Objects made now. Read as relics later.

Post Relics is positioned as material evidence: fur, hair, fiber and found adornment that gain value through wear, tension and transformation.

POST RELICS

PRIMARY MARK / UEB UNCONTRACTED / TITLE CASE

VISUAL MASTER

The braille spelling becomes the logo, enlarged into a dense, high-impact field. Solid dots give the identity the weight the previous mark lacked.

TACTILE MASTER

The tactile version uses the same UEB transcription at regulated physical dimensions. It must be raised, domed and checked before fabrication.

CAPITAL INDICATOR + POST / CAPITAL INDICATOR + RELICS

NOT A DECORATIVE DOT-MATRIX ALPHABET

Aa
HELVETICA

REGULAR / BOLD / OBLIQUE

One family. Weight, scale and spacing create hierarchy. No
ornamental serif and no condensed substitute.

TACTILE MASTER

BRAILLE CELL / SIX-DOT GRID

DOT BASE	1.5-1.6 MM
DOT HEIGHT	0.6-0.9 MM
WITHIN CELL	2.3-2.5 MM / CENTRE
ADJACENT CELLS	6.1-7.6 MM / CORRESPONDING DOTS
CLEARANCE	9.5 MM MIN FROM TEXT / BORDERS*

Digital dots are visual only. Tactile production requires physical relief and review by a certified braille transcriber against local code.

* ADA 2010 STANDARDS / 703.3

PHOTOGRAPHY DIRECTION

FUR FIBER TACTILE

Hair and fur behave as moving architecture.
Beads, feathers and raw fibers create weight,
interruption and an unstable silhouette.

OBJECT

POST RELICS

POST RELICS

THE OBJECT IS NEVER FINISHED.

A restrained identity built from what Post Relics already owns: black space, raw images, fur, fiber, tactile objects and a braille trace.
